SCHOOL OF PHARMACY
MISSION, VISION, VALUES, AND SUSTAINING GOALS

MISSION

The mission of South College School of Pharmacy is to prepare pharmacy students to be proficient practitioners who deliver team oriented, patient care with advocacy and compassion to diverse populations. The School of Pharmacy achieves its mission through commitment to excellence in education, scholarly activity including research, service, and patient care.

Adopted 2010, Revised 2012

VISION

The South College School of Pharmacy will become a regionally recognized provider of pharmacy education, patient care, and research.

Adopted 2010, Revised 2012

VALUES

Excellence among pharmacy students and faculty will be achieved through an environment that respects the individual, values diversity, instills integrity and ethical behavior, encourages academic attainment, inspires professionalism, motivates service, creates a commitment to life-long learning, fosters innovation, sustains a culture of cooperation and collaboration, promotes leadership, and recognizes academic inquiry and freedom.

Adopted 2010

SUSTAINING GOALS

Education

- Provide a curriculum, innovative and contemporary in content and mode of delivery, designed to cultivate students' successful learning and the ability to apply knowledge, think critically, and communicate effectively.

- Deliver didactic, laboratory, and experiential courses that provide pharmacy students with the knowledge, competencies, skills, and abilities needed to be highly qualified pharmacy practitioners.

- Evaluate, update, and improve the curriculum based on the results of continuous outcomes assessment.

- Recruit and enroll highly qualified, motivated pharmacy students from diverse backgrounds.

- Recruit and retain quality faculty dedicated to the Mission, Vision, and Values of the South College School of Pharmacy.
- Provide faculty with innovative teaching technologies that engage pharmacy students, accommodate diverse learning styles, and promote active learning.

- Achieve interdisciplinary education through collaboration with other health professions education institutions.

- Promote a commitment to life-long learning by pharmacy students and faculty.

Research and Scholarship

- Advance the administrative, basic and clinical sciences fundamental to pharmacy practice by conducting research that generates scholarly contribution.

- Engage in collaborative research with other health professionals and education institutions.

- Conduct research on pharmacy pedagogy to assess and document outcomes.

- Provide faculty a formal professional development program in education and research.

Community and Professional Service

- Motivate pharmacy students and faculty to engage in community outreach programs and activities.

- Partner with public and private organizations to provide pharmacy students and faculty opportunities to contribute to meeting the needs of underserved communities.

- Support pharmacy and related healthcare organization activities designed to improve patient care and advance the profession of pharmacy.

Patient Care

- Partner with public and private healthcare entities and pharmacies to provide experiential education for pharmacy students and patient care opportunities for faculty.

- Partner with public and private healthcare entities and pharmacies actively engaged in pharmacist-delivered patient care through, among other things, medication therapy management services.

- Partner with public and private healthcare entities and pharmacies that support an interdisciplinary approach to patient care.

- Support public and private healthcare entities and pharmacies seeking to expand pharmacist-delivered patient care.
